## Pneumatic Angle Grinder

Model GDA 060-200BX

Power: 0,6 kW (.80 HP)

- high power output
- simple operation
- highly durable

This grinder has been especially designed for the grinding (or sharpening) of drill-crowns. For the carbide sharpening of the drill-crowns, we recommend the use of a round, diamond grinding-tip with a max. OD of 20 mm (.78 in) and a shaft-diameter of 8 mm (.31 in). An air- and water cooling system (optional accessories) reduces the wear and tear of the drill-crowns.
